

BLOOM

FRESH NEWS FROM THE Paddock

🌸 Our favourite ... **SPRING** and
FLOWER time! 🌸

**Time to enjoy
the flowers!!**

So excited that Everlastings planted in May are starting to flower! We have come across a number of flowering patches around Perth that we can't help but stop and photograph!

This picture is of Daisy, on Voss Street in Manning.

🌸 This is a picture of my driveway on the farm 🌸

The ground was prepared by spraying the weeds, then scattering the Everlastings three years ago, and they have continued to come back ever since. There is some capeweed appearing now, so only one more year of beautiful flowers, then we will have to control of the weeds again. That would entail spraying everything out in autumn and resowing the entire section with fresh seed.

Tips for Everlasting

Everlastings in a Vase

~

- 1) Hold the flowerhead in your fingertip
- 2) Slide your fingers down the stem to remove leaves and simply snap at the base
- 3) Place all stems together, evening them up at the flowers
- 4) With secateurs, snip to make the bunch the same height
- 5) Place in a vase and change water regularly
- 6) Pick away droopy or deteriorating flowerheads over their duration

Verge planting!!

Why not plant your verge to everlastings..?
It is **WATERWISE**, **EASY-CARE** and looks **FANTASTIC!!!**

Start preparing now, by controlling the weeds and having a nice clear area for scattering seeds in April / May.
Way to go!!

DOWN ON THE FARM

Here's a pic of our 2022 everlasting crop!
Planted late to control the weeds and
seeding canola seeding took
precedence!! Still needs to be sprayed
with a grass selective to remove
ryegrass.

Always something to do on the farm.
Always fixing up things, so everything runs
smoothly when that job comes up. This is
the airseeder being prepared for seeding
in April/May.

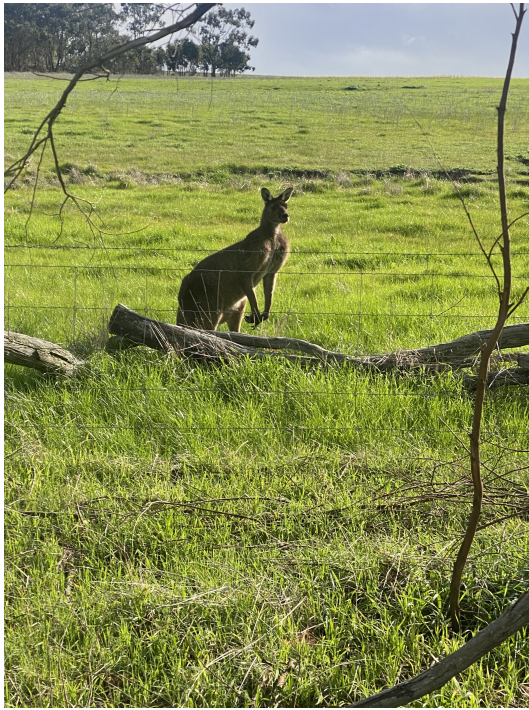

We are about to lamb marking and this is
the new product we use to mitigate any
pain for the male lambs. It is injected into
their testicles so it is an easy and quick
process of removal. Well thought up name
'numnuts'!!

Canola ear to ear on this property, with
the price of canola so good. It is hard to
not sow more and more, but we also
have sheep, and they need food too 😊

Cashew 🥰

Cashew had left without
a trace, but is now
FOUND 💕. After nearly
five years of sitting on
our verandah, he has
been spotted. He is
recognisable by his

dicky hop, but looks extremely good and has even put on some weight. Still a little friendly. So nice to know he's ok 😊 xx

🌸 It's too late to plant, but not too late to WIN a competition! 🌸

To enter... email your Everlasting photos here, to go in the draw to 'Win 3 x 50g packets'!

Competition closes at the end of October!

Keep in touch | We'd love to hear about your experience of growing Lucinda's and Zara's Everlastings. Send some pictures! Follow us on the social links below, send us your questions, progress updates and photos to jen@everlastings.com.au
