

# GROW EVERLASTINGS

## IN 5 EASY STEPS

### 01 SITE SELECTION

Everlastings will grow in most conditions, however for optimal growth, ensure you have the following:

1. Reasonably well drained soil.
2. Crumbly soil (loosen with shovel).
3. Sunny location.

Everlastings will tolerate extremely cold weather, frost, moderate waterlogging, heat, coastal, tropical and speckled sunlight.

### 02 WEED CONTROL

Everlastings should last for several years if weeds are controlled.

1. Wait for rain.
2. Ten days after rain, spray knockdown herbicide, or pull-out weeds.
3. Plant everlastings.

If there is no weed burden, seed can be planted before the rain.

### 03 FERTILISE

Everlastings thrive with the use of a good all-purpose fertiliser. If your soil is deficient in any nutrient, also consider the application of trace elements.

### 04 SEEDING

Everlasting seed should be left on the surface, lightly raked and watered in. Seed should be sown at a rate of 1g per 1m<sup>2</sup>. Seed is best planted from April to August.

### 05 PEST CONTROL

Pests must be controlled before planting. Snails LOVE Everlastings. Use the product/method that most suits your gardening style.

# HAPPY Everlasting CHRISTMAS!

## CHRISTMAS IDEAS

A unique gift for friends and family who enjoy gardening.

Personal and eco-friendly choice that nurtures something beautiful.

Thoughtful small seed stocking stuffers.

Year-end gifts for someone special or for teachers.

## WHAT TO EXPECT AFTER PLANTING...

### GERMINATION

Germination occurs 5 - 10 days after planting. Ensure soil is kept moist over this time. Everlastings will grow to 50cm in optimal conditions.

### MAINTENANCE

Provided weeds are controlled, no maintenance is required once established.

### FLOWERING

Everlastings should flower 12 weeks after planting, and are beautiful in a vase

**EVERLASTINGS ARE A SELF-SEEDING ANNUAL PLANT. THEY ARE POOR COMPETITORS AND WILL NOT BECOME AN ENVIRONMENTAL WEED.**

**QUARANTINE**  
Seed can happily be taken throughout Australia, but not brought back into WA. Please check quarantine regulations for international travel.

ONE GRAM COVERS ONE SQUARE METRE
